

WAYNE KAMACHETERA

WEBSITE DESIGNER AND DEVELOPER | JUNIOR FULL-STACK DEVELOPER

Gauteng, South Africa | 068 683 3028 | wayne.kamachetera@gmail.com
zannii34.github.io | github.com/Zannii34 | linkedin.com/in/wayne-kamachetera

Website designer and junior full-stack developer with practical experience creating responsive business websites, service and enquiry journeys, interactive demonstrations and database-backed systems. Comfortable taking work from structure and visual design through development, testing, SEO foundations and deployment.

EXPERIENCE

IT Technician / Security Systems Assistant - MazeTech Hub

Part-time | 2023-2026

Supported CCTV, access control, intercoms, cabling, basic networking, Windows devices, fault finding and general technical troubleshooting.

Website and Full-Stack Development - Project Work

Live production work, portfolio projects and coursework

Designed and deployed a live service-business website, built responsive enquiry journeys, developed Flask and SQL administration workflows, integrated APIs and maintained reliable hosting.

SELECTED PROJECTS

- **MazeTech Hub:** Designed, built, deployed and maintain a live responsive business website with service, quote and contact journeys, plus private Flask and SQL administration workflows.
- **Developer Portfolio:** Custom responsive portfolio with project filters, case studies, accessible structure, SEO metadata and GitHub Pages deployment.
- **MK Construction Concept:** Responsive business-site concept with dedicated branding, service presentation, gallery and enquiry interaction.
- **API Applications:** PokéAPI explorer and Open-Meteo weather dashboard with search, filtering, geolocation and error handling.
